(54) FAR-INFRARED LIGHT IRRADIATING POLYESTER FIBER

(57)Abstract:

PURPOSE: To obtain the subject fiber suitable for wadding cotton, carpet, inner stuff of underwear or winter cloth, etc., containing a specific amount in total of titanium oxide and silica having individually smaller particle diameters than specific value, containing specific range of ratio of titanium oxide and silica and irradiating far-infrared light.

CONSTITUTION: 5-15wt.% in total of titanium oxide (TiO2) having $\leq 2 \mu$ m, preferably $\leq 1 \mu$ m average particle diameter and silica (SiO2) having $\leq 1 \mu$ m, preferably 1-100m μ m in a ratio of TiO2/SiO2=8/1-1/4, preferably 6/1-5/5 (in weight ratio) are contained in the aimed fiber.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]
